Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 154, *Processes, data elements and documents in commerce, industry and administration*.

This document is amongst a series of International Standards dealing with the conversion of systems of writing produced by Technical Committee ISO/TC 154, *Processes, data elements and documents in commerce, industry and administration*, WG 5 *Date and time*.

This is the first edition of this document.

Introduction

Calendars are an essential element in date tracking.

With multiple calendar systems in common use across the international community, it is necessary for a number of applications to identify calendar systems used for particular dates and times, including for computing, archiving, communication and bibliography.

This standard sets out the necessary procedures to maintain the registry of calendar systems.

Date and time — Codes for calendar systems

1 Scope

This document provides a list of codes to represent calendar systems and the corresponding maintenance procedures.

The codes were devised for usage of any application requiring the expression of calendar systems in coded form, including for data interchange.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 5127, *Information and documentation — Foundation and vocabulary*

ISO 15924, *Information and documentation — Codes for the representation of names of scripts*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 34000 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <http://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org>

3.1

script

particular graphic representation or class of representations of a set of characters used to write one or more languages

[SOURCE: ISO 5127, 3.1.6.02]

3.2

code

data representation in different forms according to a pre-established set of rules

[SOURCE: ISO 639-2]

3.3

language code

combination of characters used to represent the name of a language or languages

[SOURCE: ISO 5127, 3.2.5.14]

3.4

script code

combination of characters used to represent the name of a script

[SOURCE: ISO 15924, 3.8]

3.5

calendar code

code (3.2) used to represent a calendar system

4 Common data attributes

4.1 General

4.2 Usage of ISO 639-2 code elements

The ISO 639-2 code list is used in this document to represent languages.

4.3 Usage of ISO 15924 code elements

The ISO 15924 code list is used in this document to represent scripts.

4.4 Data models

The following data models are used by other data models specified in this document.

4.4.1 Basic data types

5 Calendar systems

5.1 General

Calendar systems are used to identify and mark days within a year.

5.2 Data model and attributes

5.2.1 General

5.2.2 Code

A code that identifies the calendar system.

5.2.3 Name

A name that represents the calendar system.

5.2.4 Abbreviation

The abbreviation of the name of the calendar system.

5.2.5 Localized name

Localized versions of the calendar names tagged with script codes (ISO 15924) and language codes (ISO 639-1).

5.2.6 Specification

URI that represents the specification of this calendar system.

5.2.7 Usage population

Description on the usage populations of this calendar system.

5.2.8 Usage applications

Description on the usage applications of this calendar system.

5.2.9 Notes

Descriptive notes and remarks about this calendar system.

5.3 Code and identifier

5.3.1 Principles for inclusion in the list of calendar systems

5.3.1.1 List

The list of calendar systems in this document includes known calendar systems from bibliographic sources.

5.3.1.2 Source of names

Names and description of calendar systems are obtained from authoritative sources.

5.3.1.3 Current status of names

Calendar systems listed in this document are intended to reflect the current situation, at the time of issue of the latest update of this document.

5.3.2 Principles for allocation of code elements

5.3.2.1 Relationship with names

Calendar systems have codes in the following format:

[system-code]

EXAMPLE gre for the Gregorian calendar, defined in ISO 8601-1.

5.3.2.2 Construction of the alphabetic code

The following rules are to be adhered to for the assignment of the alphabetic code:

- The alphabetic code uses combinations, in upper case, of 3 fixed letters of the 26-character Latin alphabet, allowing for close to 3^{26} combinations.
- Codes shall encourage descriptive and distinguishable alphabetic names.

5.3.2.3 User assigned code elements

If users need code elements to represent calendar systems not included in the calendar code registry, the code prefix of zz can be used.

The code length for the calendar system identifier must be 3 letters.

Such calendar system identifiers are in the following format:

zz[calendar-system-identifier]

NOTE Users are advised that the above series of codes are not universals, those code elements are not compatible between different entities.

5.3.3 List of calendar system and their code elements

The list of items composing the content of the country code is initially defined in Annex B. Additional and new entries will be listed by the ISO 34300/AG.

Data attributes provided in the list is defined in 5.2.

Annex A (normative)

Registration

A.1 Registration authority (ISO 34300/RA)

A registration authority (ISO 34300/AG) has been appointed to operate under guidelines provided in this Annex. It has been entrusted with the following functions:

- a) to add and eliminate calendar system codes, in accordance with the rules in this document;
- b) to advise users and ISO member bodies regarding application of the codes;
- c) to update and disseminate list of calendar system codes;
- d) to maintain a reference list of calendar system codes;
- e) to publish changes made to such information;
- f) to administer the reservation of codes related to the list of calendar system codes.

Changes to this part of ISO 34300 are decided by the ISO 34300/AG and become effective immediately upon publication.

The criteria provided in A.2 to A.5 shall be observed by the ISO 34300/AG for changes to the list of code elements, and for reservations of code elements.

A.2 Addition to the list of calendar system codes

Additions to the list of calendar system codes shall be made on the basis of information from upon the request of a member of ISO 34300/AG.

The ISO 34300/AG will decide upon the addition, on the basis of the justification given for the actual requirements for international interchange. Code elements will be allocated accordingly.

A calendar to be included must fulfill the following criteria:

- The calendar system must have seen significant use in its history or in current use.

A.3 Deletion from the list of calendar system codes

Deletion from the list of calendar system codes shall be made upon the request of a member of ISO 34300/AG.

The ISO 34300/AG will decide upon the deletion, on the basis of the information received. The corresponding code element is reserved.

A.4 Deletion of elements from the list of calendar system codes

Deletion from the list of calendar system codes shall be made only by the ISO 34300/AG or upon a request to it.

The ISO 34300/AG will decide upon the deletion, on the basis of the information received. The corresponding code element is reserved.

A.5 Alterations to elements on list of calendar system codes

Alterations to a registered element shall be made only by the ISO 34300/AG or upon a request to it.

A significant change of name may require the ISO 34300/AG to change the alpha code element concerned. The ISO 34300/AG, however, shall endeavor to maintain stability in the list of code elements.

Annex B

(normative)

Alphabetical list of calendar systems in English and their code elements

Table B.1

Calendar system code	English name	Names in other languages	Abbreviation	Specification	Usage populations	Application	Remarks
gre	Gregorian Calendar		AD (after), BC (before), CE (Common Era)	ISO 8601-1	Largely global, predominant in Western countries		
jul	Julian Calendar		AD (after), BC (before), OS (Old Style)		Orthodox (Eastern) Christian (no longer used by civil governments)	predominantly Russian Orthodox documents	
chi	Chinese calendar	Traditional Chinese: 農曆, 陰曆; Simplified Chinese: 农历 or 阴历; English: Chinese Rural Calendar			China (mostly cultural and religious usage)		Type: lunisolar
heb	Hebrew Calendar	Hebrew: הלוח העברי	AM		Israel, also used in publications elsewhere		
his	Hijri-shamsi	Arabic: تقويم هجري شمسي; Persian: گاهشماری هجری خورشیدی; Pashto: لمریز لېږدیز کلیز	AH, SH		Iran, Afghanistan		Also known as Solar Hijri Calendar (abbrev.: SH)
hiq	Hijri-qamari	Arabic: التقويم الهجري	AH (after Hijri) and BH (before Hijri)		Majority Islamic countries		
cop	Coptic-EoM	Amharic: የኢትዮጵያ ዘመን አቆጣጠር			Ethiopia, also globally in Ethiopian Catholic religious publications		
ale	Alexandrian	Arabic: تقويم قبطي; Egyptian Arabic: شهر قبطيه			Egypt, used primarily in Coptic Christian religious publications		
iry	Iranian-Yazdigird				Iran, Azerbaijan		Note: Iran now uses the Hijri-shamsi

							calendar for the most part
irj	Iranian-Jalali	Persian: گاهشماری جلالی ; Persian: تقویم			Iran, Azerbaijan		Note: Iran now uses the Hijri-shamsi calendar for the most part
spa	Spanish						Note: No information, need to check with manuscript cataloguers; presumably a colonial or pre-colonial era calendar
ila	Ilahi	Bengali: বাইশাল			Bangladesh		Type: civil calendar. Note: compare with the Bengali Calendar which is not a civil one.
hin	Hindu	Hindi: हिन्दू पंचांग, Also known as: Panchanga, Hindi: पञ्चाङ्ग			India		Note: now largely replaced by the Indian Civil Calendar, many Indian publications now use Gregorian
vik	Vikram Sambat	Nepali: विक्रम सम्वत्	VS		Nepal		
ind	Indian Civil Calendar	Hindi: भारतीय राष्ट्रीय पंचांग, Tamil: இந்தியத் தேசிய நாட்காட்டி	SE		India		
ben	Bengali Calendar	Bengali: বঙ্গাব্দ			Eastern India, Bengali-speaking regions; also used in religious publications by the global Bengali community		
vir	Vira Nirvana Sambat	Also known as: Jain calendar			India, also used globally in Jain		

		(religious and civil)			religious publications		
vai	Vaisnava Calendar	Also known as: Gaurabda calendar, Krishna consciousness calendar			Braj region of India	Usage: mostly religious, some civil uses	
kur	Kurdish Calendar	Kurdish: Salnameya kurdî; Kurdish: ڕۆژنامێری Persian: گاهشماری کردی			NW Iran, N/NW Iraq, W Syria, SE Turkey		
zor	Zoroastrian Calendar	Persian: گاهشماری اوستایی نو			Iran, Azerbaijan, also used globally in Zoroastrian religious publications		
tib	Tibetan calendar	Tibetan: འཇམ་མཐོན་			Tibet, with some use in the Tibetan community of northern India		Type: lunisolar
min	Minguo Calendar	Traditional Chinese: 民國紀元			China (mainland, 1912-1949), Taiwan (from 1912)		Note: also used for official documents in the Republic of China
jap	Japanese Calendar	Japanese: 日本 の暦, English: Kōki			Japan (co-exists with Gregorian in daily usage)		Note: Used in official documents in Japan
jav	Javanese Calendar	Indonesian: Kalendar Jawa; Malay, Jawi script: فانڟكالن جاوا			Java, Indonesia		Note: generally used in religious documents, usually alongside Hijri-qamari
bal	Balinese saka	Indonesian: Kalendar Bali			Bali, Indonesia		Note: Civil calendar, continues in use on Bali
paw	Pawukon calendar	Indonesian: Wuku; Malay, Jawi script: ووكو			Bali, Indonesia		Note: Religious calendar, continues in use on Bali
tha	Thai calendar	Thai: ปฏิทินสุริยคติ			Thailand		Type: solar calendar. Note: daily use largely replaced by Gregorian

bur	Burmese calendar	Also known as: Myanmar Calendar	BE, ME		Myanmar		Note: civil calendar
bud	Buddhist Calendar	Khmer: ពុទ្ធសករាជ; Sinhala: බුද්ධ වර්ෂ or සාසන වර්ෂ			Cambodia, Laos, Myanmar, Thailand		Note: religious calendar often used alongside a civil calendar
juc	Juche Calendar	Korean: 주체연호			North Korea		
fre	French Republican Calendar	French: calendrier républicain français			France, French colonies, particularly Haiti		Also known as: French Revolutionary Calendar
may	Maya Calendar	Spanish: calendario maya			Central America, predominantly Mexico, Guatemala, Belize		Also known as: pre-Columbian Meso-American calendar
azt	Aztec Calendar				Central America, predominantly Northern Mexico		
bah	Bahai Calendar					Religious publications of the Bahai faith	
arm	Armenian Calendar	Armenian: Հայկական Եկեղեցական տոմար			Armenia		Note: also used selectively in global Armenian diaspora communities for religious use
