Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 154, *Processes, data elements and documents in commerce, industry and administration*.

This document is amongst a series of International Standards dealing with the conversion of systems of writing produced by Technical Committee ISO/TC 154, *Processes, data elements and documents in commerce, industry and administration*, WG 5 *Date and time*.

This is the first edition of this document.

Introduction

Calendars are an essential element in date tracking.

With multiple calendar systems in common use across the international community, it is necessary for a number of applications to identify calendar systems used for particular dates and times, including for computing, archiving, communication and bibliography.

This standard sets out the necessary procedures to maintain the registry of calendar systems.

Date and time — Codes for calendar systems

1 Scope

This document provides a list of codes to represent calendar systems and the corresponding maintenance procedures.

The codes were devised for usage of any application requiring the expression of calendar systems in coded form, including for data interchange.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 639-1, *Codes for the representation of names of languages – Part 1: Alpha-2 code*

ISO 639-2, *Codes for the representation of names of languages – Part 2: Alpha-3 code*

ISO 3166-1, *Codes for the representation of names of countries and their subdivisions – Part 1: Country codes*

ISO 5127 (all parts), *Information and documentation – Foundation and vocabulary*

ISO 15924:2004, *Information and documentation – Codes for the representation of names of scripts*

ISO/AWI 34000, *Date and time – Concepts and vocabulary*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <http://www.iso.org/obp>
- IEC Electropedia: available at <http://www.electropedia.org>

3.1

script

particular graphic representation or class of representations of a set of characters used to write one or more languages

[SOURCE: [3.1.6.02](#)]

3.2

code

data representation in different forms according to a pre-established set of rules

[SOURCE: [ISO 639-2](#)]

3.3

language code

combination of characters used to represent the name of a language or languages

[SOURCE: [3.2.5.14](#)]

3.4

script code

combination of characters used to represent the name of a script

[SOURCE: [3.8](#)]

3.5

calendar code

code ([3.2](#)) used to represent a calendar system

4 Calendar system models overview

The data models are arranged as shown in the following structure.

Figure 1 — Calendar system model overview in UML

5 Data types

5.1 Core data types

These are the core data types used within this document.

- `CharacterString`
- `DateTime`, `Date`, `Time`
- `Number`, `Integer`, `Decimal`, `Real`
- `Vector`
- `Boolean`

5.2 Common data types

The following data models are used by other data models specified in this document.

Figure 2 — Data types used in this document

5.2.1 iso15924Code

The [ISO 15924:2004](#) code list is used in this document to represent scripts.

5.2.2 iso639Code

The [ISO 639-2](#) code list is used in this document to represent languages.

5.2.3 LocalizedTag

The LocalizedTag is a data structure used to tag a text with the script, language and transcription codes.

Table 1 — LocalizedTag attributes

Name	Definition	Mandatory/ Optional/ Conditional	Max Occur	Data Type
lang	ISO 639-2 code for identification of language.	M	1	iso639Code
script	ISO 15924 code for identification of script.	M	1	iso15924Code

5.2.4 LocalizedString

This represents a localized string with corresponding localization information.

Table 2 — LocalizedString attributes

Name	Definition	Mandatory/ Optional/ Conditional	Max Occur	Data Type
tag	Localization information	M	1	LocalizedTag

5.2.5 JulianDate

This represents a reference to a day in the Julian Date system.

Table 3 — JulianDate attributes

Name	Definition	Mandatory/ Optional/ Conditional	Max Occur	Data Type
number	Number of days since Julian Date 0.	M	1	Integer

5.2.6 CalendarDate

This represents a date reference in a calendar system.

Table 4 — CalendarDate attributes

Name	Definition	Mandatory/ Optional/ Conditional	Max Occur	Data Type
era	Code of calendar era	0	1	CharacterString
year	Ordinal number of year in the calendar era	0	1	Integer
month	Ordinal number of month in the calendar year	0	1	Integer
day	Ordinal number of day in the previous date reference construct	M	1	Integer

6 Data models

Figure 3 — Calendar system and era models in UML

6.1 CalendarSystem

This represents a calendar system. Calendar systems are used to identify and mark days within a year.

Table 5 — CalendarSystem attributes

Name	Definition	Mandatory/ Optional/ Conditional	Max Occur	Data Type
code	Unique identifying code of this calendar era.	M	1	CharacterString
name	Name of this calendar era.	0	N	LocalizedString

Name	Definition	Mandatory/ Optional/ Conditional	Max Occur	Data Type
description	Localized versions of the calendar system names tagged with script codes (ISO 15924:2004) and language codes (ISO 639-1).	0	N	LocalizedString
abbreviation	Abbreviation of this calendar era. Multiple abbreviations are accepted.	0	N	LocalizedString
specification	A URI that provides the full specification of this calendar system.	0	1	URI
toJulianDay	Mechanism to convert a calendar date in this calendar system to a calendar date in the Julian Date system.	0	N	CharacterString
fromJulianDay	Mechanism to convert a calendar date in the Julian Date system to a calendar date in this calendar system.	0	N	CharacterString
usagePopulation	Populations that this calendar system is relevant to.	0	N	LocalizedString
usageApplications	Applications that this calendar system is relevant to.	0	N	LocalizedString

6.2 CalendarEra

This represents a calendar era.

NOTE calendar eras within a calendar system may overlap, and is therefore unnecessary to have an end reference date.

Table 6 — CalendarEra attributes

Name	Definition	Mandatory/ Optional/ Conditional	Max Occur	Data Type
code	Unique identifying code of this calendar era.	M	1	CharacterString
name	Name of this calendar era.	0	N	LocalizedString
description	Localized versions of the calendar era names tagged with script codes (ISO 15924:2004) and language codes (ISO 639-1).	0	N	LocalizedString
abbreviation	Abbreviation of this calendar era. Multiple abbreviations are accepted.	0	N	LocalizedString
referenceDate	Date of current calendar era at the day referred to by <code>referenceJulianDate</code> .	M	1	CalendarDate
referenceJulianDate	Julian date that marks the beginning of this calendar era.	M	1	JulianDate

7 Codes and identifiers

7.1 Principles for inclusion in the list of calendar systems

7.1.1 List

The list of calendar systems in this document includes known calendar systems from bibliographic sources.

7.1.2 Source of names

Names and description of calendar systems are obtained from authoritative sources.

7.1.3 Current status of names

Calendar systems listed in this document are intended to reflect the current situation, at the time of issue of the latest update of this document.

7.2 Principles for allocation of code elements

7.2.1 Relationship with names

Calendar systems have codes in the following format:

[system-code]

Figure 4

EXAMPLE gre for the Gregorian calendar, whose specification is provided in [ISO 8601-1](#).

7.2.2 Construction of the alphabetic code

The following rules are to be adhered to for the assignment of the alphabetic code:

- The alphabetic code uses combinations, in upper case, of 3 fixed letters of the 26-character Latin alphabet, allowing for close to 3^{26} combinations.
- Codes shall encourage descriptive and distinguishable alphabetic names.

7.2.3 User assigned code elements

If users need code elements to represent calendar systems not included in the calendar code registry, the code prefix of zz can be used.

The code length for the calendar system identifier must be 3 letters.

Such calendar system identifiers are in the following format:

zz[calendar-system-identifier]

Figure 5

NOTE Users are advised that the above series of codes are not universals, those code elements are not compatible between different entities.

7.3 List of calendar system and their code elements

The list of items composing the content of the country code is initially defined in [Annex B](#). Additional and new entries will be listed by the ISO 34300/AG.

Data attributes provided in the list is defined in [Clause 7](#).

Annex A (normative)

Registration

A.1 Registration authority (ISO 34300/RA)

A registration authority (ISO 34300/RA) has been appointed to operate under guidelines provided in this Annex. It has been entrusted with the following functions:

- a) to add and eliminate calendar system and calendar era codes, in accordance with the rules in this document;
- b) to advise users and ISO member bodies regarding application of the codes;
- c) to update and disseminate list of calendar system and calendar era codes;
- d) to maintain a reference list of calendar system and calendar era codes;
- e) to publish changes made to such information;
- f) to administer the reservation of codes related to the list of calendar system and calendar era codes.

Changes to the content of the list of codes becomes effective immediately upon publication.

The criteria provided in [A.3](#) to [A.6](#) shall be observed by the ISO 34300/AG for changes to the list of code elements, and for reservations of code elements.

A.2 Advisory group (ISO 34300/AG)

An advisory group (ISO 34300/AG) has been appointed to ensure the operations of the registration authority (ISO 34300/RA) are in accordance with guidelines provided in this Annex.

A.3 Addition to the list of calendar system and calendar era codes

Additions to the list of calendar system and calendar era codes shall be made on the basis of information from upon the request of a member of ISO 34300/AG.

The ISO 34300/AG will decide upon the addition, on the basis of the justification given for the actual requirements for interchange or encoding. Code elements will be allocated accordingly.

Basic eligibility for a calendar system to be assigned a calendar system code is one of:

- The system has been approved for official use at some level of government (current or historic);
- The system has had significant use in history;
- The system is in current use.

A calendar era to be assigned a calendar era code has to be associated with at least one eligible calendar system. Since a calendar system requires at least one calendar era, the application and assignment of calendar system and calendar era codes can be performed at once.

A.4 Deletion from the list of calendar system and calendar era codes

Deletion from the list of calendar system and calendar era codes shall be made upon the request of a member of ISO 34300/AG.

The ISO 34300/AG will decide upon the deletion, on the basis of the information received. The corresponding code element is reserved.

A.5 Deletion of elements from the list of calendar system and calendar era codes

Deletion from the list of calendar system and calendar era codes shall be made only by the ISO 34300/AG or upon a request to it.

The ISO 34300/AG will decide upon the deletion, on the basis of the information received. The corresponding code element is reserved.

A.6 Alterations to elements on list of calendar system and calendar era codes

Alterations to a registered element shall be made only by the ISO 34300/AG or upon a request to it.

A significant change of name may require the ISO 34300/AG to change the alpha code element concerned. The ISO 34300/AG, however, shall endeavor to maintain stability in the list of code elements.

Annex B

(normative)

Alphabetical list of calendar systems in English and their code elements

Table B.1 — Akan calendar

Calendar system code	aka
English name	Akan calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.2 — Alexandrian

Calendar system code	ale
English name	Alexandrian
Names in other languages	Arabic: تقويم قبطي ; Egyptian Arabic: شهر قبطيه
Abbreviation	
Specification	
Usage populations	Egypt
Application	Religious publications of the Coptic Christian faith
Remarks	

Table B.3 — Armenian Calendar

Calendar system code	arm
English name	Armenian Calendar
Names in other languages	Armenian: Հայկական Եկեղեցական տոմար
Abbreviation	
Specification	
Usage populations	Armenia
Application	
Remarks	Note: Used by Armenian diaspora communities for religious use

Table B.4 — Assyrian calendar

Calendar system code	asr
English name	Assyrian calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.5 — Astronomical year numbering

Calendar system code	ast
English name	Astronomical year numbering
Names in other languages	
Abbreviation	

Specification	Linear count of year with year 0 set to proleptic Gregorian year 1 BC, month and day according to Gregorian calendar
Usage populations	
Application	
Remarks	

Table B.6 — Aztec Calendar

Calendar system code	azt
English name	Aztec Calendar
Names in other languages	English: Mexica calendar
Abbreviation	
Specification	
Usage populations	Central America, predominantly Northern Mexico (TODO: more specific.)
Application	
Remarks	

Table B.7 — Bahá'í Calendar

Calendar system code	bah
English name	Bahá'í Calendar
Names in other languages	English: Badí' Calendar
Abbreviation	
Specification	
Usage populations	
Application	Religious publications of the Bahai faith
Remarks	

Table B.8 — Balinese saka

Calendar system code	bal
English name	Balinese saka
Names in other languages	Indonesian: Kalendar Bali
Abbreviation	
Specification	
Usage populations	Bali, Indonesia
Application	Civil calendar
Remarks	Note: In use in Bali

Table B.9 — Bengali Calendar

Calendar system code	ben
English name	Bengali Calendar
Names in other languages	Bengali: বঙ্গাব্দ
Abbreviation	
Specification	
Usage populations	Eastern India, Bengali-speaking regions (TODO: more specific.)
Application	
Remarks	Note: Used by the global Bengali community for religious use

Table B.10 — Berber calendar

Calendar system code	ber
English name	Berber calendar
Names in other languages	
Abbreviation	
Specification	

Usage populations	
Application	
Remarks	

Table B.11 — Borana calendar

Calendar system code	bor
English name	Borana calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.12 — Buddhist Calendar

Calendar system code	bud
English name	Buddhist Calendar
Names in other languages	Khmer: ព្រឹត្តិសករាជ; Sinhala: බුද්ධ වර්ෂ or සාසන වර්ෂ
Abbreviation	
Specification	
Usage populations	Cambodia, Laos, Myanmar, Thailand
Application	Religious calendar
Remarks	Note: often used alongside a civil calendar

Table B.13 — Burmese calendar

Calendar system code	bur
English name	Burmese calendar
Names in other languages	English: Myanmar Calendar
Abbreviation	BE, ME
Specification	
Usage populations	Myanmar
Application	Civil calendar
Remarks	

Table B.14 — CCSDS Julian Day

Calendar system code	ccj
English name	CCSDS Julian Day
Names in other languages	
Abbreviation	CCSDS JD
Specification	Linear count by day according to the epoch of 0h Jan 1, 1958.
Usage populations	
Application	
Remarks	

Table B.15 — Chinese calendar

Calendar system code	chi
English name	Chinese calendar
Names in other languages	Traditional Chinese: 農曆, 陰曆; Simplified Chinese: 农历, 阴历; English: Chinese Rural Calendar
Abbreviation	
Specification	

Usage populations	China
Application	Cultural usage
Remarks	Type: lunisolar

Table B.16 — CNES Julian Day

Calendar system code	cjd
English name	CNES Julian Day
Names in other languages	
Abbreviation	CNES JD
Specification	Linear count by day according to the epoch of 0h Jan 1, 1950.
Usage populations	
Application	
Remarks	Note: Introduced by the CCSDS.

Table B.17 — Chiljungsan

Calendar system code	cjs
English name	Chiljungsan
Names in other languages	Korean: 칠정산
Abbreviation	
Specification	
Usage populations	Korea
Application	Cultural usage
Remarks	

Table B.18 — Coptic-EoM

Calendar system code	cop
English name	Coptic-EoM
Names in other languages	Amharic: የኢትዮጵያ ዘመን አቆጣጠር
Abbreviation	
Specification	
Usage populations	Ethiopia
Application	
Remarks	Note: Used in Ethiopian Catholic publications

Table B.19 — Celestial Stems and Earthly Branches

Calendar system code	cseb
English name	Celestial Stems and Earthly Branches
Names in other languages	Traditional Chinese: 干支曆; Simplified Chinese: 干支历; English: ganzhi
Abbreviation	
Specification	
Usage populations	
Application	Cultural usage
Remarks	

Table B.20 — Dangun giwon

Calendar system code	dan
English name	Dangun giwon
Names in other languages	Korean: 단군기원, 단기; Traditional Chinese: 檀君紀元, 檀紀
Abbreviation	
Specification	Linear count of year with epoch from Gregorian year 2334BC
Usage populations	Korea
Application	Cultural usage

Remarks	
---------	--

Table B.21 — Dublin Julian Day

Calendar system code	djd
English name	Dublin Julian Day
Names in other languages	
Abbreviation	Dublin JD
Specification	Linear count by day according to the epoch of noon Dec 31, 1899.
Usage populations	
Application	
Remarks	Note: Introduced by the CNES.

Table B.22 — Fasli Calendar

Calendar system code	fas
English name	Fasli Calendar
Names in other languages	Urdu: فصلی ; Arabic: فصلي
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.23 — French Republican Calendar

Calendar system code	fre
English name	French Republican Calendar
Names in other languages	French: calendrier républicain français; English: French Revolutionary Calendar
Abbreviation	
Specification	
Usage populations	France, French colonies, Haiti (TODO: more specific)
Application	
Remarks	

Table B.24 — Gaelic calendar

Calendar system code	gae
English name	Gaelic calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.25 — Gregorian Calendar

Calendar system code	gre
English name	Gregorian Calendar
Names in other languages	
Abbreviation	AD (after), BC (before), CE (Common Era)
Specification	ISO 8601-1
Usage populations	Global
Application	
Remarks	

Table B.26 — Hebrew Calendar

Calendar system code	heb
English name	Hebrew Calendar
Names in other languages	Hebrew: הלוח העברי
Abbreviation	AM
Specification	
Usage populations	Israel
Application	
Remarks	

Table B.27 — Hindu

Calendar system code	hin
English name	Hindu
Names in other languages	Hindi: हिन्दू पंचांग; English: Panchanga; Hindi: पञ्चाङ्ग
Abbreviation	
Specification	
Usage populations	India
Application	Religious calendar
Remarks	Note: Largely replaced by the Indian Civil Calendar in daily use

Table B.28 — Hijri-qamari

Calendar system code	hiq
English name	Hijri-qamari
Names in other languages	Arabic: التقويم الهجري
Abbreviation	AH (after Hijri) and BH (before Hijri)
Specification	
Usage populations	
Application	
Remarks	Note: Used in many Islamic countries

Table B.29 — Hijri-shamsi

Calendar system code	his
English name	Hijri-shamsi
Names in other languages	Arabic: تقويم هجري شمسي; Persian: گاهشماری هجری خورشیدی; Pashto: لمريز لېږديز کليز; English: Solar Hijri Calendar
Abbreviation	AH, SH
Specification	
Usage populations	Iran, Afghanistan
Application	
Remarks	

Table B.30 — Huangdi calendar

Calendar system code	hua
English name	Huangdi calendar
Names in other languages	Traditional Chinese: 黃帝紀元, 軒轅紀年; Simplified Chinese: 黄帝纪元, 轩辕纪年
Abbreviation	
Specification	Linear count of year with epoch from Gregorian year 2698BC
Usage populations	
Application	Historic calendar, cultural usage
Remarks	

Table B.31 — Ilahilgbo calendar

Calendar system code	igb
English name	Ilahilgbo calendar
Names in other languages	Igbo: Ògùàfọ̀ Ìgbò
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.32 — Ilahi

Calendar system code	ila
English name	Ilahi
Names in other languages	Bengali: বাইশা সাল
Abbreviation	
Specification	
Usage populations	Bangladesh
Application	Civil calendar
Remarks	Note: compare with the Bengali Calendar which is not a civil one.

Table B.33 — Indian Civil Calendar

Calendar system code	ind
English name	Indian Civil Calendar
Names in other languages	Hindi: भारतीय राष्ट्रीय पंचांग, Tamil: இந்தியத் தேசிய நாட்காட்டி
Abbreviation	SE
Specification	
Usage populations	India
Application	
Remarks	

Table B.34 — Iranian-Jalali

Calendar system code	irj
English name	Iranian-Jalali
Names in other languages	Persian: گاهشماری جلالی تقویم
Abbreviation	
Specification	
Usage populations	Iran, Azerbaijan
Application	
Remarks	Note: Iran now mostly uses the Hijri-shamsi calendar.

Table B.35 — Iranian-Yazdigird

Calendar system code	iry
English name	Iranian-Yazdigird
Names in other languages	
Abbreviation	
Specification	
Usage populations	Iran, Azerbaijan
Application	
Remarks	Note: Iran now mostly uses the Hijri-shamsi calendar.

Table B.36 — Japanese Calendar

Calendar system code	jap
English name	Japanese Calendar
Names in other languages	Japanese: 和暦
Abbreviation	
Specification	
Usage populations	Japan
Application	Civil calendar
Remarks	Note: Used in official documents in Japan

Table B.37 — Javanese Calendar

Calendar system code	jav
English name	Javanese Calendar
Names in other languages	Indonesian: Kalender Jawa; Malay, Jawi script: قانغكالن جاوا
Abbreviation	
Specification	
Usage populations	Java, Indonesia
Application	Religious calendar
Remarks	Note: Usually used alongside Hijri-qamari

Table B.38 — Julian date

Calendar system code	jld
English name	Julian date
Names in other languages	
Abbreviation	JD
Specification	Resolution B1
Usage populations	
Application	
Remarks	

Table B.39 — Juche Calendar

Calendar system code	juc
English name	Juche Calendar
Names in other languages	Korean: 주체연호
Abbreviation	
Specification	
Usage populations	North Korea
Application	
Remarks	

Table B.40 — Julian Calendar

Calendar system code	jul
English name	Julian Calendar
Names in other languages	
Abbreviation	AD (after), BC (before), OS (Old Style)
Specification	
Usage populations	Orthodox Christian (TODO: more specific)
Application	Religious publications of the Orthodox Christian faith
Remarks	

Table B.41 — Japanese Imperial Year

Calendar system code	kok
English name	Japanese Imperial Year
Names in other languages	Japanese: 神武天皇即位紀元, 皇紀; English: Kōki, Japanese Imperial Year
Abbreviation	
Specification	Linear count of year with epoch from Gregorian year 660BC, month and day according to Gregorian calendar
Usage populations	
Application	
Remarks	

Table B.42 — Kurdish Calendar

Calendar system code	kur
English name	Kurdish Calendar
Names in other languages	Kurdish: Salnameya kurdî; Kurdish: رۆژژمێری کوردی; Persian: گاهشماری کردی
Abbreviation	
Specification	
Usage populations	NW Iran, N/NW Iraq, W Syria, SE Turkey (TODO: more specific)
Application	
Remarks	

Table B.43 — Lilian date

Calendar system code	lid
English name	Lilian date
Names in other languages	
Abbreviation	
Specification	Count of days of the Gregorian calendar. Linear count by day according to the epoch of Oct 15, 1582.
Usage populations	
Application	
Remarks	

Table B.44 — Lithuanian calendar

Calendar system code	lit
English name	Lithuanian calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.45 — Ancient Macedonian calendar

Calendar system code	mac
English name	Ancient Macedonian calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	

Remarks	
---------	--

Table B.46 — Malayalam calendar

Calendar system code	mal
English name	Malayalam calendar
Names in other languages	English: Kollam Era
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.47 — Mars Sol Date

Calendar system code	mar
English name	Mars Sol Date
Names in other languages	
Abbreviation	
Specification	Linear count of Martian days according to the epoch of noon Dec 29, 1873.
Usage populations	
Application	
Remarks	

Table B.48 — Maya Calendar

Calendar system code	may
English name	Maya Calendar
Names in other languages	Spanish: calendario maya; English: pre-Columbian Meso-American calendar
Abbreviation	
Specification	
Usage populations	Central America, predominantly Mexico, Guatemala, Belize (TODO: more specific)
Application	
Remarks	

Table B.49 — Melanau calendar

Calendar system code	mel
English name	Melanau calendar
Names in other languages	Malay: Bulan Melanau
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.50 — Minguo Calendar

Calendar system code	min
English name	Minguo Calendar
Names in other languages	Traditional Chinese: 民國紀元, 民國紀年; Simplified Chinese: 民国纪元, 民国纪年
Abbreviation	
Specification	Linear count of year with epoch from Gregorian year 1912, month and day according to Gregorian calendar
Usage populations	China
Application	

Remarks	
---------	--

Table B.51 — Modified Julian day

Calendar system code	mjd
English name	Modified Julian day
Names in other languages	
Abbreviation	Modified JD, MJD
Specification	Resolution B1
Usage populations	
Application	
Remarks	Note: Introduced by NASA in 1979.

Table B.52 — Mongol Calendar

Calendar system code	mon
English name	Mongol Calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	Cultural usage
Remarks	Type: lunisolar

Table B.53 — Muisca calendar

Calendar system code	mui
English name	Muisca calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	Type: lunisolar

Table B.54 — Nanakshahi

Calendar system code	nan
English name	Nanakshahi
Names in other languages	Punjabi: ਨਾਨਕਸ਼ਾਹੀ
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.55 — Nepal Sambat

Calendar system code	nep
English name	Nepal Sambat
Names in other languages	Nepalese: नेपाल सम्बत
Abbreviation	
Specification	
Usage populations	
Application	

Remarks	Type: lunar
---------	-------------

Table B.56 — Pawukon calendar

Calendar system code	paw
English name	Pawukon calendar
Names in other languages	Indonesian: Wuku; Malay, Jawi script: ووكو
Abbreviation	
Specification	
Usage populations	Bali, Indonesia
Application	Religious calendar
Remarks	Note: In use in Bali

Table B.57 — Rata Die

Calendar system code	rad
English name	Rata Die
Names in other languages	
Abbreviation	R.D.
Specification	Count of days of the Common Era. Linear count by day according to the epoch of Jan 1, 1 proleptic Gregorian calendar.
Usage populations	
Application	
Remarks	

Table B.58 — Reduced Julian day

Calendar system code	rjd
English name	Reduced Julian day
Names in other languages	
Abbreviation	Reduced JD
Specification	Linear count by day according to the epoch of noon Nov 16, 1858.
Usage populations	
Application	
Remarks	Note: Introduced by SAO in 1957.

Table B.59 — Rumi calendar

Calendar system code	rum
English name	Rumi calendar
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	Note: solar Ottoman calendar based on the Julian calendar

Table B.60 — Somali calendar

Calendar system code	som
English name	Somali calendar
Names in other languages	Somali: Soomaali tiro ammin
Abbreviation	
Specification	
Usage populations	Somalia
Application	

Remarks	
---------	--

Table B.61 — Spanish

Calendar system code	spa
English name	Spanish
Names in other languages	
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	Note: Presumably a colonial or pre-colonial era calendar

Table B.62 — Thai lunar calendar

Calendar system code	tai
English name	Thai lunar calendar
Names in other languages	Thai: ปฏิทินจันทรคติ ; English: Tai calendar
Abbreviation	
Specification	
Usage populations	Thailand
Application	Cultural usage
Remarks	Type: lunar

Table B.63 — Tamil calendar

Calendar system code	tam
English name	Tamil calendar
Names in other languages	Tamil: தமிழ் மாதங்கள்
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.64 — Thai solar calendar

Calendar system code	tha
English name	Thai solar calendar
Names in other languages	Thai: ปฏิทินสุริยคติ
Abbreviation	
Specification	
Usage populations	Thailand
Application	Cultural usage
Remarks	Type: solar calendar.

Table B.65 — Tibetan calendar

Calendar system code	tib
English name	Tibetan calendar
Names in other languages	Tibetan: འཕགས་ལོ་; Simplified Chinese: 藏历; Traditional Chinese: 藏曆
Abbreviation	
Specification	
Usage populations	Tibet Autonomous Region of China
Application	Cultural usage

Remarks	Type: lunisolar
---------	-----------------

Table B.66 — Truncated Julian day

Calendar system code	tjd
English name	Truncated Julian day
Names in other languages	
Abbreviation	Truncated JD
Specification	Linear count by day according to the epoch of 0h May 24, 1968.
Usage populations	
Application	
Remarks	Note: Introduced by the IAU in 1955.

Table B.67 — Unix time

Calendar system code	unx
English name	Unix time
Names in other languages	
Abbreviation	
Specification	Linear count of seconds according to the epoch of 0h Jan 1, 1970.
Usage populations	
Application	
Remarks	Note: Similar to POSIX time.

Table B.68 — Vaisnava Calendar

Calendar system code	vai
English name	Vaisnava Calendar
Names in other languages	English: Gaurabda calendar, Krishna consciousness calendar
Abbreviation	
Specification	
Usage populations	Braj region of India
Application	Religious calendar
Remarks	Note: Sometimes used as civil calendar.

Table B.69 — Vikram Sambat

Calendar system code	vik
English name	Vikram Sambat
Names in other languages	Nepali: विक्रम सम्वत्; English: Vikrami calendar
Abbreviation	VS
Specification	
Usage populations	Nepal
Application	
Remarks	

Table B.70 — Vira Nirvana Sambat

Calendar system code	vir
English name	Vira Nirvana Sambat
Names in other languages	English: Jain calendar (religious and civil)
Abbreviation	
Specification	
Usage populations	India
Application	
Remarks	Note: Used in Jain religious publications.

Table B.71 — Yoruba calendar

Calendar system code	yor
English name	Yoruba calendar
Names in other languages	Yoruba: KÒJÓDÁ; English: Kojoda
Abbreviation	
Specification	
Usage populations	
Application	
Remarks	

Table B.72 — Zoroastrian Calendar

Calendar system code	zor
English name	Zoroastrian Calendar
Names in other languages	Persian: گاهشماری اوستایی نو
Abbreviation	
Specification	
Usage populations	Iran, Azerbaijan
Application	
Remarks	Note: Used in Zoroastrian religious publications.
